

REMARKS

This supplemental amendment is submitted in the present application. Applicant has added one additional independent claim and a dependent claim. The additional independent claims presents a detailed set of functional elements carried out by the invention. No new matter has been added, and the newly added claims places the Application in better condition for allowance. Applicant respectfully requests entry of these claims, which along with the amendments and accompanying arguments presented in Amendment A, places all claims in condition for allowance.

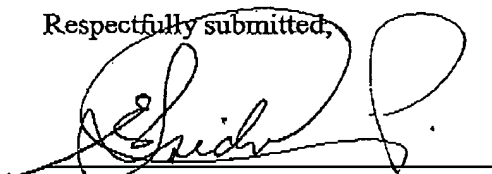

Applicant also hereby incorporates by reference those arguments proffered in Amendment A covering the original claims. Since there are overlaps in the features of those claims and the present new claim, and the original claims have been shown to be not obvious over the various references (or combination thereof), the arguments further support an extension of a notice of allowance for the newly added claims.

CONCLUSION

Applicant has added new claims covering the disclosed subject matter and supported by the specification. These new claims present a sequence of process steps that are not taught nor suggested by any one of the references of record or combinations thereof. Applicant, therefore, respectfully requests issuance of a Notice of Allowance for these new claims as well as the original pending claims.

Applicant further respectfully requests the Examiner contact the undersigned attorney of record at 512.343.6116 if such would further or expedite the prosecution of the present Application.

Respectfully submitted,

Eustace P. Isidore
